

Career Opportunity @ TRIARQ Health, India

Job Title: Infrastructure Specialist

TRIARQ Health is a Physician Practice Services company that partners with doctors to run modern patient-centred practices so they can be rewarded for delivering high-value care. TRIARQ's Physician-led partnerships simplify practices' transition to value-based care by combining our proprietary, cloud-based practice, care management platform and patient engagement services to help doctors focus on better outcomes.

Work Experience: 10- 15 years

Industry Type: IT-Software, Software Services

Location: Pune / Nashik / Navi Mumbai

Employment Type: Permanent

Job Summary:

We are seeking an experienced Infrastructure Specialist with a strong background in managing and optimizing IT infrastructure. The ideal candidate will have 10-15 years of relevant experience and a deep understanding of cloud technologies, network security, and overall infrastructure architecture. The Infrastructure Specialist will play a key role in ensuring the reliability, security, and scalability of our organization's IT infrastructure.

Responsibilities:

1. Infrastructure Planning and Design:

- Collaborate with cross-functional teams to understand business requirements and design scalable and reliable infrastructure solutions.
- Develop and maintain infrastructure architecture blueprints and documentation.

2. Cloud Technologies:

- Possess in-depth knowledge and hands-on experience with leading cloud platforms (e.g., AWS, Azure, Google Cloud).
- Design, implement, and manage cloud-based infrastructure solutions.
- Optimize cloud services for cost, performance, and reliability.

3. Network Security:

- Implement and maintain robust network security measures to safeguard the organization's data and systems.
- Conduct regular security assessments and implement necessary security controls.
- Stay updated on the latest security threats and technologies to proactively address potential risks.

4. Infrastructure Monitoring and Optimization:

- Implement monitoring tools to ensure the health and performance of the infrastructure.
- Proactively identify and address bottlenecks, performance issues, and system outages.
- Continuously optimize infrastructure for cost-effectiveness and efficiency.

5. Disaster Recovery and Business Continuity:

- Develop and maintain disaster recovery and business continuity plans.
- Conduct regular drills and testing to ensure the effectiveness of recovery procedures.

6. Vendor Management:

- Work with vendors to evaluate, select, and implement infrastructure solutions.
- Manage relationships with key infrastructure-related vendors.

7. Team Collaboration:

- Collaborate with IT teams, including development, operations, and security, to ensure a cohesive and integrated approach to infrastructure management.
- Mentor and provide guidance to junior members of the infrastructure team.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- 10-15 years of experience in IT infrastructure management.
- Proven experience with cloud platforms (AWS, Azure, Google Cloud).
- Strong knowledge of network security principles and best practices.
- Experience with virtualization technologies and containerization.
- Relevant certifications (e.g., AWS Certified Solutions Architect, Certified Information Systems Security Professional) are a plus.
