.NET Developer

TRIARQ Health is a Physician Practice Services company that partners with doctors to run modern patient-centered practices so they can be rewarded for delivering high-value care. TRIARQ's Physician-led partnerships simplify practices' transition to value-based care by combining our proprietary, cloud-based practice, care management technology platform and patient engagement services to help doctors focus on better outcomes.

Experience: 3+ Years
Industry Type: IT-Software, Software Services
Location: Pune
Employment Type: Full Time, Permanent

YOUR RESPONSIBILITIES INCLUDE:

Position Overview: We are seeking a highly skilled and experienced **.NET Developer** with a strong background in SQL to join our dynamic team. The ideal candidate should have a minimum of 3 years of professional experience in .NET development and SQL database management. You will be responsible for designing, developing, and maintaining .NET applications while ensuring the integrity and performance of our SQL databases.

Key Responsibilities:

Software Development:

- Design, develop, and maintain high-quality .NET applications using C# and the .NET framework.
- Collaborate with cross-functional teams to understand business requirements and translate them into technical solutions.
- Write clean, well-documented, and efficient code that follows best practices and coding standards.

Database Management:

- Create and optimize SQL database schemas, tables, and queries for efficient data storage and retrieval.
- Perform database maintenance tasks, including backups, indexing, and performance tuning.
- Ensure data integrity and security by implementing proper access controls and encryption.
- Troubleshooting and Debugging:
- Identify and resolve software defects, performance issues, and system errors.
- Conduct thorough testing and debugging to ensure the reliability of applications.

Collaboration:

- Collaborate with other developers, software architects, and project managers to deliver projects on time and within scope.
- Participate in code reviews and provide constructive feedback to team members.
- Documentation:
- Maintain comprehensive documentation of code, configurations, and database schemas.
- Prepare technical documentation for both internal and external stakeholders.

Continuous Learning:

- Stay updated with the latest industry trends, technologies, and best practices in .NET development and SQL database management.
- Apply new knowledge and skills to improve existing systems and processes.

Qualifications:

- Bachelor's degree in computer science or a related field (or equivalent work experience).
- Minimum of 3 years of professional experience in .NET development.
- Proficiency in C# and the .NET framework.
- Strong experience in SQL database design, development, and optimization.
- Familiarity with web development technologies (ASP.NET, MVC, Web API).
- Experience with version control systems (e.g., Git).
- Strong problem-solving and analytical skills.
- Excellent communication and teamwork abilities.
- Relevant certifications (e.g., Microsoft Certified: Azure Developer Associate) are a plus.

If you are a passionate .NET Developer with a proven track record in SQL database management and are eager to work on challenging projects in a collaborative environment, we encourage you to apply. Join our team and contribute to building innovative software solutions that make a difference.
