

Career Opportunity @ TRIARQ Health, India

Senior Data Analyst (Tableau Developer)

TRIARQ Health is a Physician Practice Services company that partners with doctors to run modern patient-centered practices so they can be rewarded for delivering high-value care. TRIARQ's Physician-led partnerships simplify practices' transition to value-based care by combining our proprietary, cloud-based practice, care management platform and patient engagement services to help doctors focus on better outcomes.

Industry Type: IT-Software, Software Services

Location: Pune

Division: Healthcare Technology

Number of positions: 1

Job Description:

We are seeking a highly skilled and experienced Senior Data Analyst with a strong background in data analysis, visualization, and SQL. The ideal candidate should have 3-5 years of hands-on experience, with a focus on leveraging Tableau for data visualization and analysis. The Senior Data Analyst will play a crucial role in extracting actionable insights from large datasets, providing valuable business intelligence to support decision-making processes.

Responsibilities:

1. Data Analysis and Interpretation:

- Conduct in-depth data analysis to uncover trends, patterns, and insights that can inform strategic business decisions.
- Translate complex data sets into meaningful and actionable insights for various stakeholders.

2. SQL Querying and Database Management:

- Proficiently write SQL queries to extract and manipulate data from relational databases.
- Collaborate with the IT team to ensure efficient data storage, retrieval, and maintenance.

3. Tableau Visualization:

- Design and develop Tableau dashboards and reports to visualize key performance indicators and trends.
- Maintain and enhance existing Tableau visualizations to meet evolving business requirements.

4. Data Cleaning and Preprocessing:

- Clean, preprocess, and validate large datasets to ensure accuracy and consistency.
- Implement data quality checks and suggest improvements to data collection processes.

5. Collaboration and Communication:

- Collaborate with cross-functional teams to understand their analytical requirements and provide data-driven solutions.
- Communicate findings and insights effectively to both technical and non-technical stakeholders.

6. Continuous Learning and Skill Development:

- Stay updated on industry best practices, emerging technologies, and tools related to data analysis.
- Proactively seek opportunities for skill development and knowledge enhancement.

Requirements:

- Bachelor's degree in a relevant field (e.g., Statistics, Computer Science, Data Science).
- 3-5 years of proven experience as a Data Analyst, with a focus on Tableau and SQL.
- Proficient in data visualization techniques and best practices using Tableau.
- Strong SQL skills with the ability to write complex queries for data analysis.
- Experience with ETL processes and data warehousing.
- Excellent analytical and problem-solving skills.
- Strong communication and collaboration skills.
- Ability to work independently and manage multiple priorities effectively.
