

Career Opportunity @ TRIARQ Health, India

Data Analyst (Tableau Developer)

TRIARQ Health is a Physician Practice Services company that partners with doctors to run modern patient-centered practices so they can be rewarded for delivering high-value care. TRIARQ's Physician-led partnerships simplify practices' transition to value-based care by combining our proprietary, cloud-based practice, care management platform and patient engagement services to help doctors focus on better outcomes.

Industry Type: IT-Software, Software Services

Location: Pune

Division: Healthcare Technology

Number of positions: 1

Job Description:

We are seeking a skilled and motivated **Tableau Developer with 2-3 years of experience** to join our dynamic team. The successful candidate will play a crucial role in designing, developing, and maintaining Tableau dashboards and reports to support business intelligence initiatives. The ideal candidate should have a strong background in data visualization, analytics, and a solid understanding of Tableau best practices.

Responsibilities:

1. Dashboard Development:

- Design, develop, and maintain Tableau dashboards and reports to meet business requirements.
- Collaborate with stakeholders to understand data visualization needs and translate them into effective Tableau solutions.

2. Data Analysis:

- Perform data analysis to identify trends, patterns, and insights that will aid in decision-making processes.
- Ensure data accuracy and consistency in Tableau visualizations.

3. Data Integration:

- Work closely with data engineers and other teams to integrate data from various sources into Tableau for comprehensive reporting.
- Troubleshoot and resolve data integration issues.

4. Performance Optimization:

- Optimize Tableau dashboards for performance and responsiveness.
- Identify and implement best practices for Tableau development.

5. Documentation:

- Create and maintain documentation for Tableau solutions, including data sources, calculations, and dashboard functionality.
- Provide training and support to end-users as needed.

6. Collaboration:

- Collaborate with cross-functional teams to understand business requirements and ensure Tableau solutions align with organizational goals.
- Participate in team meetings and contribute to the overall success of the business intelligence team.

Requirements:

1. Bachelor's degree in Computer Science, Information Technology, or a related field.
2. 2-3 years of hands-on experience with Tableau development.
3. Strong understanding of data visualization best practices and principles.
4. Proficient in SQL for data analysis and manipulation.
5. Experience with data modeling and creating Tableau data extracts.
6. Familiarity with data warehousing concepts.
7. Excellent communication and collaboration skills.
8. Ability to work independently and as part of a team.

Preferred:

1. Tableau Desktop and Server certification.
2. Knowledge of other business intelligence tools.
3. Experience in ETL processes and tools.
