

Career Opportunity @ TRIARQ Health, India

Senior Java Developer

TRIARQ Health is a Physician Practice Services company that partners with doctors to run modern patient-centered practices so they can be rewarded for delivering high-value care. TRIARQ's Physician-led partnerships simplify practices' transition to value-based care by combining our proprietary, cloud-based practice, care management platform and patient engagement services to help doctors focus on better outcomes.

Industry Type: IT-Software, Software Services

Location: Pune

Division: Healthcare Technology

Number of positions: 1

Job Description:

We are seeking an experienced Senior Java Developer to join our dynamic team. The ideal candidate should have a minimum of 5 years of hands-on experience in Java development, with a strong understanding of the full software development lifecycle. The candidate should be able to design, develop, test, deploy, and maintain high-performance and scalable Java applications.

Responsibilities:

- Collaborate with cross-functional teams to analyze, design, and implement new features and enhancements for Java-based applications.
- Participate in the entire software development lifecycle, including requirement gathering, architecture, coding, testing, deployment, and maintenance.
- Write well-designed, efficient, and maintainable code while adhering to best practices and coding standards.
- Perform code reviews to ensure code quality and provide constructive feedback to team members.
- Troubleshoot, debug, and resolve issues in production and non-production environments.
- Stay updated on industry trends and advancements in Java development to recommend improvements and optimizations.
- Mentor junior developers and assist in their professional growth.

Requirements:

- Bachelor's degree in computer science, Engineering, or related field.
- Minimum of 5 years of professional experience in Java development.
- Solid understanding of Java, J2EE, and related technologies.
- Experience with Spring Framework (Spring Boot, Spring MVC, Spring Security, etc.).
- Proficient in database design and SQL (e.g., MySQL, PostgreSQL, Oracle).
- Experience with RESTful web services and API development.
- Strong problem-solving skills and attention to detail.
- Excellent communication and collaboration skills.
- Ability to work independently and as part of a team in a fast-paced environment.
- Familiarity with Agile development methodologies.

Preferred Qualifications:

- Experience with cloud platforms (e.g., AWS, Azure, or GCP).
- Knowledge of containerization and orchestration tools (e.g., Docker, Kubernetes).
- Familiarity with microservices architecture.
- Understanding of DevOps practices and tools.
- Experience with version control systems (e.g., Git).
